Summary

Motivated MCA student passionate about full-stack web development with hands-on experience building scalable and user-centric web applications. Skilled in React.js, Node.js, MongoDB, JavaScript, and AI-powered application development with a strong focus on problem-solving, UI optimization, and application performance. Eager to contribute technical skills and continuously learn emerging technologies through real-world development projects.

Education

Lovely Professional University

2025 – Present

Master of Computer Applications (MCA), Jalandhar, India

Projects

AI-Powered Job Tracker Application

GitHub | Live Demo

- Engineered a MERN-based job tracking platform featuring application management, smart filtering, authentication, and AI-powered resume matching.
- Designed an interactive dashboard with advanced search capabilities and streamlined workflows to simplify job application tracking.
- Integrated AI-based compatibility analysis to provide real-time resume and job matching recommendations.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, AI API Integration

Expert Booking Application

GitHub | Live Demo

- Created a responsive expert booking platform supporting real-time slot scheduling and seamless appointment workflows.
- Integrated frontend interfaces with backend services to manage user authentication and booking operations efficiently.
- Enhanced user experience across desktop and mobile devices through optimized layouts and smooth navigation design.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, JavaScript, CSS

Bhajan Management Web Application

GitHub | Live Demo

- Developed a web application to organize bhajan records and manage multiple satsang sessions with structured data handling.
- Implemented smart duplicate-detection logic to avoid bhajan repetition across 60+ sessions.
- Added search, pagination, and record management features to improve accessibility and data organization.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas

Technical Skills

Languages: JavaScript, Java

Frontend: HTML, CSS, React.js, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB, Firebase

AI: Prompt Engineering, AI API Integration, Generative AI Fundamentals

Tools: Git, GitHub, Vercel, MongoDB Atlas

Core Concepts: Data Structures, OOPs, DBMS, Operating Systems, MVC Architecture

Certifications

- AI Skills Passport – EY & Microsoft (2026)
- IBM 1M1B — AI + Sustainability Virtual Internship (2026)

Achievements

- Earned the Microsoft AI Skills Fest 2026 Badge.
- Earned the AI Skills Passport Badge through Microsoft Elevate.
- Solved 200+ coding problems on LeetCode covering Data Structures and Algorithms.
- Built and deployed multiple real-world MERN stack applications.
